Quick Guide to Municipal Landfill Scrap Tire Storage and Collection

All Manitoba scrap tire generators are required to register with Tire Stewardship Manitoba (TSM) to receive free collection services. Over 1300 registrants comprised of retailers, municipalities and other commercial generators participate in the program and have agreed to collect Manitoba scrap tires without point-of-collection fees and store them appropriately to reduce fire and environmental hazards. In addition to the free collection provided to all registered scrap tire generators, municipalities receive a fifty-cent per tire storage incentive for accepting and storing scrap tires at their landfills.

Scrap tire generators, including municipalities, who do not register with TSM are responsible for the full cost of collection and processing that is charged by the processor. These costs are approximately \$2,500 for an average semi-trailer load of scrap tires.

To be eligible for free scrap tire collection and the fifty-cent per tire incentive, municipalities must follow TSM's scrap tire storage and collection guidelines below and must not charge any fees to registered commercial generators or Manitoba residents for scrap tires that are clean and off-rims. TSM does not provide the 50-cent municipal incentive payment or pay haulers for collection of material that does not comply with this guideline.

TSM SCRAP TIRE STORAGE AND COLLECTION GUIDELINES

To help facilitate the best scrap tire collection service possible:

1. Receive scrap tires clean and off-rims at no charge from TSM registered commercial generators or Manitoba residents;
2. Do not bury or burn any scrap tires;
3. Discourage receiving any scrap tire material that does not meet guideline criteria (i.e. clean and off-rims). To reduce the number of scrap tires that fail to meet storage and collection standards, landfills may recover costs from the generators of non-eligible material and reach a commercial agreement with a hauler for its collection;
4. Ensure the proper storage of scrap tires by,
 - a. Ensuring only scrap tires are stored in the area designated "SCRAP TIRES ONLY"
 - b. separating the piles of small to medium sized tires from the large (OTR) tires
 - c. have the tires clean and off the rims
 - d. stack tires in rows preferably
 - e. make scrap tires easily and readily accessible defined as the tires being stored in a location that is free and clear of any obstructions and / or debris and allows the tires to be directly loaded onto the hauler's truck

- f. arrange the tires in such a way that there is enough room for a pickup truck and trailer to park next to the tire pile
 - g. have the tires stored on a solid base in an all weather area, to ensure a truck and trailer can pick up tires even when it rains, and the truck does not sink in the mud;
5. Contact a registered TSM hauler listed below and provide an accurate count on the number of scrap tires;

Reliable Tire Recycling (Hauls all scrap tires)

P: 204-774-0725

OTR Recycling (Primary Off-The-Road Scrap Tire Hauler)

P: 204-768-3179

6. Mail or Fax your TSM Municipal Incentive Claim Form with a copy of the haulers receipt(s) for the number of tires collected. Claim forms are available from the TSM office by calling (204) 661-3242, Toll Free (866) 724-5002, or email info@tsmb.ca.
